

ALL KIND OF NETS

We can make all kinds of nets in various sizes, tailor made to your specifications. The most commonly used materials include Polypropylene, Nylon, Manila, etc.

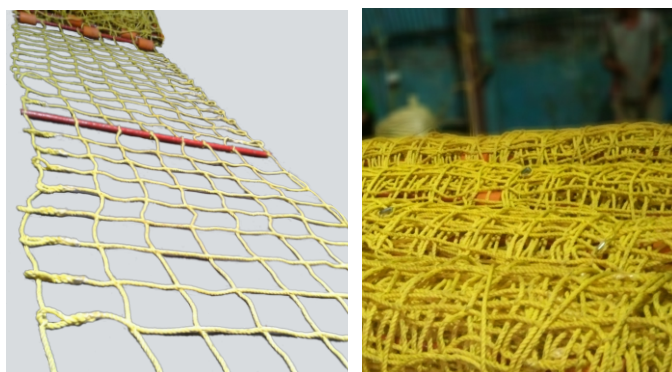

CARGO NET | CODE : T04101

A cargo net, usually square or rectangle, is used in transferring cargo to and from ships.

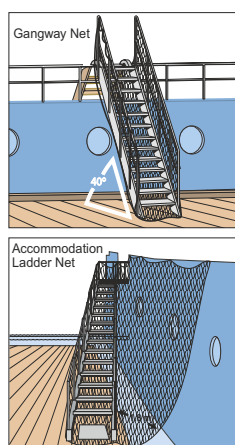

SCRAMBLE NET | CODE : T04102

A Scramble net is fixed to the rail or deck for quick deployment, and for easy rolled up storage. In the event of an emergency, the scramble net allows a large number of crew and passengers to disembark. They usually come with spreader bars made of wood, fibreglass, aluminium etc.

GANGWAY SAFETY NET | CODE : T04103

The Gangway and Accommodation Ladder safety netting must be fitted under every part of the ladder, extending on both sides, and must be kept taut at all times.

HELIPAD/HELIDECK NET | CODE : T04104

Helideck Nets are used on the offshore helicopter landing decks, oil rigs and platforms where more friction and support is required. The purpose of these nets is to prevent the Helicopter from rolling and pitching off the helipads.
