AMBULANCE BOAT

safe seas, safe shores

Ambulance Boat

CRAFTWAY ENGINEERS LTD.

India's first of its kind Ambulance Boat built to improve response efficiency and provide emergency medical care in areas that are inaccessible by road.

Our Ambulance boats are perfect for remote locations where providing even basic health care is a challenge. They can also be used for conducting regular Eye care, Dental, Diabetes, Blood Donation Camps as well as emergency evacuation operations.

These Boats are equipped with advanced life support equipment such as automated respirators, defibrillators, emergency operating table, stretchers, medicines etc.

These equipment enable life-saving and stabilising treatment to commence immediately when a patient is brought on board and can be continued as the boat speeds towards the closest available hospital.

Specifications:

Length	: 10 M
Breadth	: 3.5M
Capacity	: 12 pax in normal condition
Top Speed	: 22-25 Knots
Propulsion	: 2 X 115 HP 4 Stroke OBM

Standard Equipments
