TANK FED SAFETY SHOWER/EYEWASH

Tank Fed Showers are ideal for areas with erratic or no water supply to guarantee the correct flow rate.

- Product Code : M04101
- Meets ANSI Z358.1 standards
- Activated by optional Foot Panel or Panic Bar
- Guarantees 15 minutes of Water
- Available for hazardous and non-hazardous areas

MAINS FED SAFETY SHOWER/EYEWASH

Mains Fed Showers are ideal for indoor use and for areas where water supply and pressure is guaranteed.

- Product Code : M04102
- Meets ANSI Z358.1 standards
- Combination shower and eye/facewash unit
- Alarms, Lamps, Foot Treadles, etc. available upon request

PORTABLE SHOWER/EYEWASH

These units are designed for quick response first-aid where plumbed-in unit or water supply is not available. It's compact design enables it to be easily stored and moved.

- Product Code : M04103
- Meets ANSI Z358.1 standards
- Air Charged and Gravity Fed types available
- Easy to install, use, and re-position

EMERGENCY EYEWASH KIT

Small handy bottles easy to carry and to incorporate in first aid box, tool box etc.

- Product Code : M04104
- Eyewash Solution
- Complete with eye cup, dust cap, and instructions
- Wall mounted, mirror, heating accessories available upon request

PARAGUARD STRETCHER

Compact versatile stretcher that can be used for both horizontal and vertical lifting.

- Product Code: M01101
- Constructed from flame resistant materials
- Comes with valise for easy storage and transport
- Optional 4 point lifting sling available

BASKET STRETCHER

Rigid one piece stretcher, usually constructed of high density polyethylene or stainless steel.

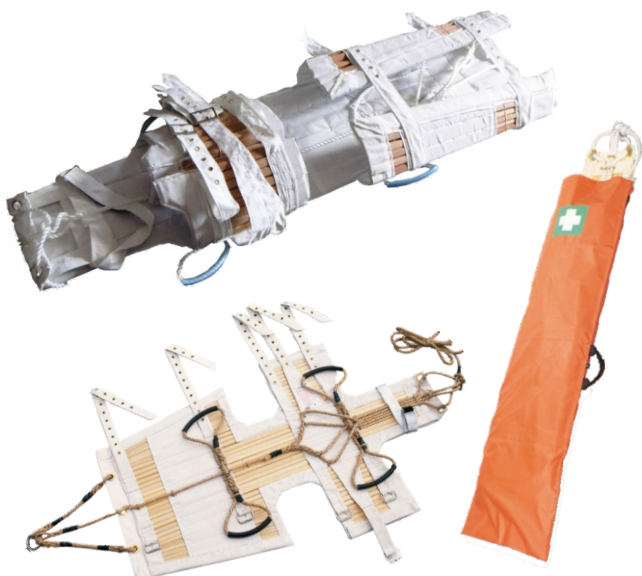

- Product Code : M01103
- Chemical, UV, rust and corrosion resistant
- Optional 4 point lifting bridles, carrying case, floatation collar available upon request

NEIL ROBERTSON STRETCHER

Stretcher of choice for difficult rescue emergencies when casualty needs to be lowered or lifted to safety. Ideal for use in engine-rooms, cargo holds and boiler rooms.

- Product Code : M01101
- Made of flexible semi rigid canvas
- Folded for easy storage and accessing small spaces
- Vertical and horizontal lifting capability
- Light weight, ready to use

GAS DETECTORS

Gas detectors are used to detect combustible, flammable, toxic gases, and oxygen depletion in a confined spaces before entry. These detectors are widely used in the Oil & Gas, Mining, Fire Services, and Chemical industries.

- Product Code : M01103
- Water and dust resistant, Intrinsically safe
- Warning signals: visual, audible, vibration
- Detects up to 4 types of gases and vapours

OIL SPILL KIT

Designed for prompt response and quick clean-up of oil spills. Our oil spill kit provides you with almost everything you need to become an efficient first responder.

- Product Code: M10101
- Built in conjunction with IMO guidelines and OPA90
- Comprises oil spill and personnel protection equipment
- Stored in watertight FRP box

ELECTRICAL RISK RESCUE KIT

Electrical emergency kit contains everything you need to rescue any person in a situation where there is an electrical hazard up to 25kV. Basic components includes:

- Product code: M11101
- Insulating platform
- Insulated gloves
- Telescopic insulating stick
- Voltage detector
- Insulated boots
- Insulated cable cutter
- Talcum Powder
- Safety instructions, posters

WINDSOCK

Windsocks are designed to indicate wind direction and relative wind speed. They are typically used at airports, highways and locations where there is risk of gas leakage.

- Product Code: M07101
- Pole made of stainless steel; sock made of oxford nylon
- Comprises rotating head with bearing
- Optional customized mounting and lighting available

GAS DETECTORS

Emergency evacuation mask designed to provide respiratory protection and reduce risk associated with toxic air caused by fire, smoke, chemical leakage, etc.

- Product Code: M12101
- Complies with EN 403 standards
- Comprises a visor, hood, and built-in filter
- Easy to use, one size fits all

FIRST AID KIT

We can provide First Aid Kits specifically tailored to your requirement and in line with the Occupational Safety and Health Administration (OSHA) guidelines.

- Product Code: M021201
- Available for use in workplaces from 1-50 persons
- Cabinet of fibreglass or steel
- Printing on cabinet as per requirement

RESUSCITATOR KIT

Resuscitator provides positive pressure to inflate the lungs of an unconscious person or who is not breathing. Manual and Automatic Resuscitation systems available, with or without oxygen cylinder as per client requirement. | Product Code: M03101

AUTOMATIC EXTERNAL DEFIBRILLATOR (AED)

Portable, small, easy to use device that is designed to deliver an electrical shock to a person having Sudden Cardiac Arrest (SCA). Designed to be used by non-medical people within 3-5 minutes after collapse of victim. Product Code: M05101

OFFSHORE GRAB BAG

A personal escape aid, designed to abandon an installation in case of a fire or emergency. Grab Bags can be customized to contain specific items you require. Basic items that comprise a Grab Bag are listed below:

- Grab Bag
- Escape Smoke Hood
- Lifejacket
- Torch light with batteries
- Fire Gloves
- Light Stick

Product Code: M08101
